

The Proof in the Numbers:

Why Aon Hewitt chose Windward for document generation

Windward is the best solution available because of its small footprint. Other solutions have too large of a footprint to generate the speed that Windward is able to do. **—Ethan Kayes, Aon Hewitt**

<p>AON HEWITT'S Key Performance Metrics</p> <p>Tested Volume of Reports/Speed</p> <ul style="list-style-type: none"> • 5,000 documents each minute, at an average of 5 pages per document • Document generation totals: 1,500,000 pages per hour, or 36 MILLION pages per day 	<p>Windward Reports: Unmatched Speed and Power</p> <p>The Windward document generation solution reduces complexity, production time and total cost. By enabling users to generate documents independently of IT/IS services, Windward offers unprecedented docgen capabilities – without sacrificing power or functionality. Because it uses Microsoft Word, Excel and PowerPoint as its layout tool, Windward requires little training. Plus, Windward can be installed within minutes and fully enabled system-wide within hours.</p> <hr/> <p>About Aon Hewitt</p> <p>Aon Hewitt is among the world's top global human capital and management consulting firms, providing a complete array of consulting, outsourcing and insurance brokerage services. Professionals possess extensive knowledge and experience in a variety of fields and help companies of all sizes attract and retain top talent. Aon Hewitt helps companies achieve better business results by finding, developing, motivating and rewarding employees in ways that fit with broad financial and business goals.</p>
<p>Tested Number of Concurrent Users</p> <ul style="list-style-type: none"> • 2500 concurrent users on a small 2-4 core system. • Windward was not affected; limitation was determined by current bandwidth access to the database. • Aon recommended internal focus shift to setting up databases to properly handle large volumes of users because “this will limit the speed before any limitation is seen from Windward.” 	
<p>Tested Complex Table Setup</p> <ul style="list-style-type: none"> • 40,000 tables, 30,000 views and 1 Terrabyte of information sent out to Windward for a single customer. • Able to reduce reading the table in DB2 from 40 minutes down to under 2 seconds by tweaking the XML Schema for smaller tables and faster loading. • Never encountered a limitation that Windward could not handle.
